Nguyễn Anh Quý

Web Developer

Seeking a Web Developer Internship to leverage my skills in system architecture and optimization. With a proactive approach to learning through real-world projects, I am committed to sharpening my analytical mindset, self-learning capability, and adaptability to new technologies, steadily advancing toward becoming a proficient Full-stack Developer within the next 2-3 years.

Technical Skills

Frontend: HTML5, CSS3, TailwindCSS, JavaScript, React.js, Responsive Web Design.
Backend & Architecture: PHP, Laravel 11, MySQL, Service-Repository Pattern.
Mobile & Integration: Dart (Flutter), RESTful APIs, PayOS Payment Gateway, Pusher.
Artificial Intelligence (AI): Gemini API (Vision & RAG), Prompt Engineering.
System & Security: Caching strategies, Queues, 2FA, Bcrypt hashing, SQL Injection (SQLi) & CSRF protection.
Tools & Methodologies: Git, Docker, Apache, Agile/Scrum, AI-Assisted Development,Node.js (Vite/NPM).

English: Technical Reading: Capable of reading technical documentation (Proficient in utilizing translation tools)

Soft Skills

Teamwork (Agile/Scrum)
Analytical & Problem-solving skills
Technical Documentation (SRS)
Self-learning & Research

Education

Thu Đuc College of Technology (TDC) | 2024 - 2027
Major: Information Technology (Web Developer Track)
Achievement: Academic Excellence Scholarship (Semester 1, 2024-2025)
GPA: 3.1/4.0

Projects & Experience

Project: "Đien May PRO" E-commerce Website(dienmaypro.nguyenanhquy.id.vn) | 03/*2026 – 05/2026*

- **Tech Stack:** PHP (PDO), MySQL, Docker, Flutter, Gemini AI, PayOS.
- **Role:** Backend & Mobile App Developer (Team of 3).
- **Key Responsibilities:**
  - **System Architecture & Security:** Designed the system using the Service-Repository pattern; implemented 2FA and utilized Prepared Statements to ensure robust protection against SQL injection.
  - **Features & CRM:** Developed dynamic multi-dimensional product filters using SQL and built an Admin CRM dashboard for comprehensive user account management.
  - **Mobile & AI Integration:** Spearheaded the development of a cross-platform mobile application using Flutter; integrated PayOS via Webhooks for automated payments and deployed an RAG-based AI Chatbot for customer support.
  - **DevOps:** Containerized the application with Docker, configured Apache servers, implemented WAF, and managed end-to-end deployment.
- **Result:** Achieved a final project score of **8.0/10** with a stable, live-production environment.

Project: Advanced E-commerce & Mini-ERP System(tmdtgroupg.nthanhhien.id.vn) | *03/2026 – 05/2026*

- **Tech Stack:** Laravel 11, MySQL, TailwindCSS, Gemini AI, Pusher, React.
- **Role:** Backend & AI Integration Developer (Team of 5).
- **Key Responsibilities:**
  - **Core Operations:** Developed dynamic AJAX filters, product comparison matrices, loyalty point wallets, and high-concurrency Flash Sale features utilizing Pessimistic Locking to prevent over-selling.
  - **AI Ecosystem:** Integrated a multi-threaded RAG Chatbot (for inventory, coupons, and scheduling), AI-driven cross-selling/dynamic pricing, computer vision for hardware diagnostics, and AI-powered risk assessment/UGC moderation.
  - **System Management:** Built a CRM for violation management, implemented asynchronous notification systems (Laravel Queue), and optimized performance through advanced Caching strategies.
  - **Infrastructure & Automation:** Developed a real-time Theme Customizer (Live Iframe Sync) and authored automated CLI scripts to streamline infrastructure setup.
- **Result:** System successfully passed rigorous stress testing and maintains stable performance under high concurrent loads.
